Microsoft Word

Microsoft Excel

Microsoft PowerPoint

PROFILE

Full-stack systems. Built end to end.

Software engineering student with hands-on experience building full-stack, data-driven applications. Comfortable designing databases, building APIs, and working across the stack in collaborative, fast-paced environments.

EDUCATION

African Leadership University

Bachelor of Software Engineering

Expected May 2028 | Academic standing: Second Upper

Coursework: Enterprise Web Development, Web Infrastructure, Linux and IT Tools, Python Programming and Databases, Foundations Project, and Skills Immersion I.

WORK EXPERIENCE

Software Development Intern

Elevanda Ventures | Kigali | Apr 2026 - Present

- Designed relational database schemas and engineered secure REST APIs for accurate, consistent structured records.
- Used Docker to maintain consistent, reliable environments across projects.
- Collaborated across teams with Git, organized documentation, and clean, auditable repositories.

PROJECTS

RECYX

Digital Transaction & Circular Economy Platform | Mar 2026

Full-stack platform built with FastAPI, React.js, PostgreSQL, SQLAlchemy ORM, pytest, and Jest.

Momentum

AI-Driven Mission Workspace | Apr 2026

AI-driven workspace application built with FastAPI, Python, React.js, and Docker.

PROGRAMS & COMMUNITY

SoCreative Entrepreneurship Program

Certified graduate, British Council & ALU School of Business
Entrepreneurship and business fundamentals | Mar 2025

Portive Youth

Community volunteer, cultural arts hub | Port Sudan | Jun 2025
Planned and supported public engagement initiatives.
